Solar Installer - Full Job Announcement

Company Overview

Whole Sun Designs Inc. is a solar installer based in Bloomington, IN. We have installed over 500 solar PV systems in southern Indiana over the past decade. We are committed to providing the highest quality services in a timely, efficient manner. WSD empowers individual businesses and homeowners to generate their own solar power with systems comprised of high-quality, locally-sourced components. These systems are installed and maintained with highly-skilled employees who have a stake in the success of the business through profit sharing.

Position Overview

The Solar Installer is responsible for the installation, commissioning, and troubleshooting of residential and commercial solar PV and battery storage systems. Systems may be rooftop or ground-mounted.

Job Functions

- Install solar PV systems including: flashing, racking, module level power electronics (optimizers), array wiring, junction boxes, conduit, inverters, meter bases, and all other system components
- Work with 240 VAC and 600 VDC electrical circuits safely
- Be able to connect, test, commission, and troubleshoot system components
- Read schematics and follow technical installation instructions
- Interact with homeowners/clients from diverse backgrounds in a respectful manner
- Work on roofs, ladders, crawlspaces, attics, and other residential and commercial areas
- Load the job truck with system components from inventory checklist
- Keep job site, truck, and shop clean and organized
- Warehouse management of inventory, organization and cleanliness
- Recycle waste from all sources
- Ability to receive and check in new shipments
- Assist management with documentation of process and task instructions
- Participate in regular crew meetings
- Maintain necessary installation hand tools
- Work in a fast-paced, demanding work environment
- Other duties as assigned

Requirements

- Be:
 - comfortable working on all types of roofs and ladders
 - comfortable working outside in all types of weather
 - self-directed and able to direct work effort of crew towards project completion
 - able to pass background check
- Have:
 - a high attention to detail and a quality control orientation
 - good communication and interpersonal skills
 - a strong mechanical aptitude
 - a clean driving record
 - motivation to be a great solar installer

Bonus Experience/Abilities

- Prior construction (solar, electrical, roofing, and/or framing) experience preferred
- Solar certification a plus
- OSHA 10 hour certification preferred
- A focus on sustainability
- Attitude of continual improvement
- Team orientation

Benefits

- Health insurance after 60 days
- Five sick/mental health days
- Flexible work schedule (4x10 hour days)
- Competitive pay ranging between \$15-20/hr
- Profit Sharing
- Eight paid holidays (including your birthday)
- Solar at cost

All applicants must include a cover letter with their resume to be considered for the position.

Job Type: Full-time

Pay: \$15.00 - \$20.00 per hour, based on experience.

COVID-19 Considerations:

Proof of covid vaccination required for employment. All staff are vaccinated. Staff wear company provided masks whenever in a public space or engaging with customers/the public. Our priority is to keep everyone safe and healthy.
