

Solar panel installer - seasonal

Looking for a seasonal solar installer for a small, professional, Madison-based solar installation business. Applicants must be available to begin work in March or April 2023 and stay on through August, October, or November. This opportunity can lead to full-time year-round employment as a Lead Solar Installer, someone who has mastered solar installation and can work independently.

This is an entry-level position for those looking to get into the renewable energy industry and learn from the best. A chance to use both your brain and your body and work in beautiful places.

Requirements:

- 1) being physically fit, able to lift heavy objects and walk on rooftops
- 2) available 4-5 full days per week
- 3) positive attitude and strong work ethic
- 4) a solid ability to learn and remember new things quickly
- 5) being mechanically inclined and handy/skilled with tools

To apply: please respond by email with your resume, a brief description of yourself and how you feel you're a good fit for this work, and a list of times you would be available to meet in person.

For more information on the company please check out drewssolar.com

Compensation starts at \$22-\$26 per hour with increases as the employee becomes more skilled. We will pay fees for any industry-related educational courses, and we offer health insurance reimbursement. We will sign off on hours worked toward a journeyman or master electrician license.
