## Job Titel -Project Installer Senior

### **Key Responsibilities:**

#### **1. Project Management:**

- Plan and execute installation projects from start to finish, ensuring adherence to project timelines and budgets.
- Coordinate with project managers, clients, and other stakeholders to ensure clear communication and project alignment.

#### **2. Team Leadership:**

- Supervise and mentor a team of installers, providing guidance and support as needed.
- Assign tasks and responsibilities to team members, ensuring optimal use of resources and skills.

#### **3. Installation and Technical Expertise:**

- Perform complex installations, modifications, and repairs as required.
- Troubleshoot and resolve installation issues, ensuring high-quality and efficient project completion.

#### **4. Quality Assurance:**

- Conduct regular inspections to ensure installations meet company standards and client specifications.
- Implement quality control measures and procedures to maintain high standards of workmanship.

#### **5. Safety and Compliance:**

- Ensure all installation activities comply with company safety policies and relevant regulations.
- Conduct safety briefings and ensure team adherence to safety protocols.

#### **6. Documentation and Reporting:**

- Maintain detailed records of installation activities, including progress reports, incident reports, and project documentation.
- Provide regular updates to project managers and clients on project status and any issues encountered.

#### **7. Client Interaction:**

- Act as the primary point of contact for clients during the installation phase, addressing any concerns or questions they may have.
- Ensure client satisfaction by delivering high-quality installation services and effective communication.

### **Qualifications:**

- Education: High school diploma or equivalent; technical or trade school certification preferred.
- Experience: Minimum of 5-7 years of experience in installation or a related field, with at least 2 years in a supervisory or senior role.

### **Skills:**

- Strong technical skills and knowledge of installation procedures and equipment.
- Excellent leadership and team management abilities.
- Strong problem-solving and troubleshooting skills.
- Effective communication and interpersonal skills.
- Proficiency in using relevant tools and software for project management and reporting.
- Certifications: Relevant certifications in installation or related technical fields are a plus.
- Physical Requirements: Ability to lift heavy equipment, work in various environmental conditions, and perform physically demanding tasks.

### **Working Conditions:**

- This role may require travel to various project sites.
- Work may be performed indoors and outdoors, sometimes in challenging weather conditions.
- Occasional weekend or evening work may be required to meet project deadlines.
